

THE CALL OF JUNE 18

1940 VICHY

60 years later...

2003 PARIS

Citizens friends,

Our politicians not only lie to us and manipulate us but, they also bring disgrace on us.

After taking care of their corporate image thanks to the strong support of the population of France, our government which was against the war in Iraq – illegal according to international law- betrayed their principles by signing UN resolution no 1483 on May 22. This resolution put an end to the embargo in Iraq and at the same time ended the control of Iraq by the UN, relegating the supreme international authority to a simple coordinator of food assistance. After savagely and illegally conquering Iraq, the attackers can do as they please.

In 1940, the nation was betrayed. In 2003, the whole humanity is betrayed and scoffed in its thirst of justice and fairness. « The French Exception » that one is so proud of should have stood out in such a way imposing a dignified and upstanding attitude to serve justice and law.

During these last months, more than thirty millions of women and men from every horizon demonstrated their refusal to participate in barbarism and any war.

WILL THIS WORLD OUTBURST OF CITIZEN RESPONSABILITY BE IGNORED, DENIGRATED AND DISPISED?

Now that the massacre is over, the main interest becomes the lucrative business that can be created by the reconstruction of a crushed country. And the famous « peace camp » - France being in the lead, country of Human Rights, lecturing us once in a while – changed sides disgracing themselves and looking ridiculous before world's eyes.

The UN has been taken over by imperialist terrorism and has lost all legitimacy and credibility. It has repudiating the international law, the only guarantee to the world's balance.

Action NON à la GUERRE
